

**REMARKS**

The present Office Action sets forth an election requirement and requires applicant to elect between specie 1 characterized by two different dielectric sections, specie 2 characterized by three different dielectric sections, specie 3 characterized by four different dielectric sections and species 4 characterized by more than four different dielectric sections. In response, applicant elects the specie 1 claims to which the claims shall be restricted if no generic claim is finally held to be allowable. These claims include at least claims 1, 5, 7, 9, 10, 11, 12, and 13. In that regard, applicant submits the specie 1 claims are generic relative to the other species identified in the Office Action.

The Office Action also notes a requirement for unity of invention. In order to expedite prosecution of this application, applicant has amended independent claim 1 to include the feature earlier presented in dependent claim 6 to recite the radiation reflector is provided at the interface between the two sections of the dielectric body. Applicant has also amended claims 2, 7, 9, 12 and 13, and cancelled claims 6 and 14. By these amendments, applicant respectfully submits the claims reflect unity of invention and are in condition for allowance.

In view of the foregoing, applicant respectfully requests the issuance of a timely Notice of Allowance.

The Commissioner is authorized to charge any fees or deficiencies or credit any overpayments to Eugene M. Cummings, P.C., Deposit Account No. 50-4199 with reference to attorney docket number (0934-0046).

Respectfully submitted,

EUGENE M. CUMMINGS, P.C.
